## Xperience Product Expansion for Government Services (1 CEU)

[audiologyonline.com/ce/signia-siemens/events/details/34495](https://audiologyonline.com/ce/signia-siemens/events/details/34495)

The Signia Xperience product portfolio with YourSound technology expands to include rechargeability, CROS transmitters, and telecoil functionality. Explore the new features and applications of the Pure® Charge&Go X and Inductive Charger II, CROS Pure Charge&Go X, CROS Pure 312 X, and Pure 312 X T hearing instruments. Features on the Signia App will be discussed.

## Connexx 9.2 Programming Software for Government Services (1 CEU)

[audiologyonline.com/ce/signia-siemens/events/details/34497](https://audiologyonline.com/ce/signia-siemens/events/details/34497)

Discover new features in Connexx 9.2 supporting Xperience in this comprehensive overview of the fitting software. Adjusting the Dynamic Soundscape Processing slider will be discussed.

## Xperience Signia's New CROS Solution (1 CEU)

[audiologyonline.com/ce/signia-siemens/events/details/34296](https://audiologyonline.com/ce/signia-siemens/events/details/34296)

Signia is providing benchmark technology solutions for wearers with single-sided deafness. Learn about our CROS solutions including the latest CROS X utilizing YourSound technology and motion sensors which deliver the right amount of listening support for every situation, even when the wearer is moving.

## Tinnitus Management and Patient-Centered Care (1 CEU)

[audiologyonline.com/ce/signia-siemens/events/details/34381](https://audiologyonline.com/ce/signia-siemens/events/details/34381)

This presentation will share the basics for incorporating tinnitus management into your practice. The wide array of Signia tinnitus therapy features available as well as an overview of the therapy protocols, counseling strategies and outcome measures will be explored.
